

Tool & Equipment Inventory

Prepared for Will Coburn

Compiled from photos of tool drawers, a rolling cabinet, and loose items — September 2026
(tool-tag close-ups and Model/Serial numbers added Sept 19, 2026)

Estimated Total Replacement Value

\$21,466.26

This figure is a rough retail replacement estimate built from photos, not a physical inspection, appraisal, or insurance-grade valuation. The Testo smart probes and manifold, CPS vacuum gauges, Toptes gas leak detector, Klein ET450 kit, RIDGID RP 351 press tool, and every Milwaukee/DeWalt tool with a visible catalog number are priced against live online listings; everything else is an estimate based on the visible brand, size, and apparent model. See the notes at the end of this report for known uncertainties.

Summary by Section

Section	Est. Value
Drawer 1 — Wrenches & Hand Tools	\$704.00
Drawer 2 — Drill & Driver Bits	\$564.98
Drawer 3 — Saw Blades	\$237.00
Regulators, Rigging, HVAC Fittings & Standalone Items	\$3,939.90
Hammers, Refrigeration Fittings, Electrical, Clamps, Taps & Sockets	\$2,089.00
Batteries, Charger & Cordless Power Tools	\$10,046.90
Welding PPE, HVAC Instruments, Torch Kit & Tool Bags	\$2,234.64
Testo Smart Probes (live-priced, pictured within sections above)	\$1,649.84
GRAND TOTAL	\$21,466.26

A companion Excel workbook (*Will_Coburn_Tool_Inventory.xlsx*) contains the same data, including Model No. / Serial No. columns, as live, editable formulas.

Testo Smart Probes — Live-Priced

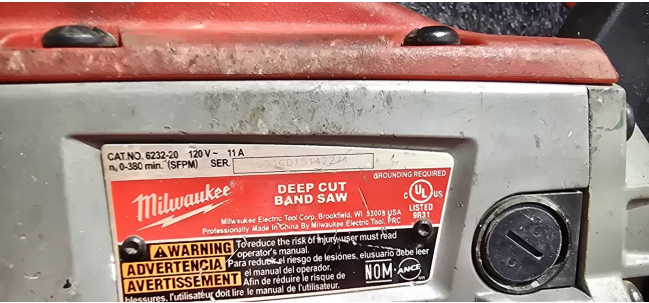

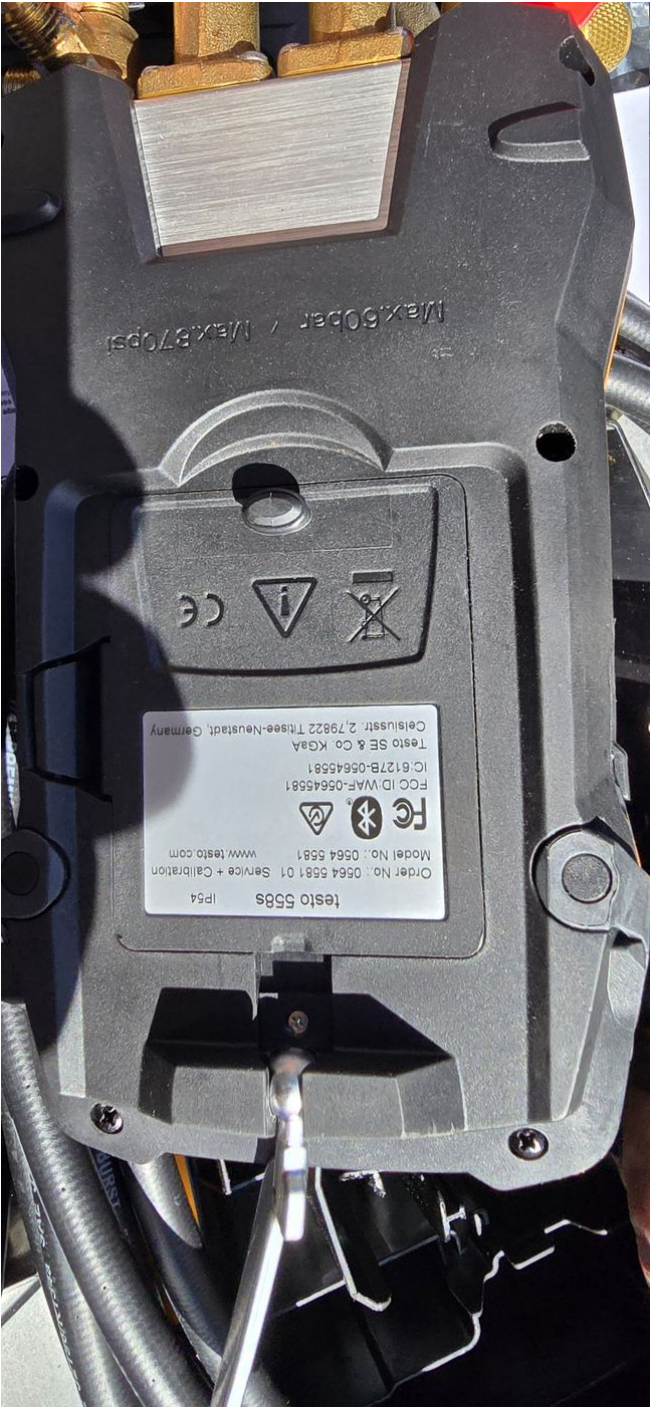

These Testo Smart Probe instruments appear scattered across the photos in the sections above (mainly the hammers/fittings set and the welding-PPE/instruments set). Per your request, they are priced against live current retail listings rather than estimated, checked on trutechtools.com and testequipmentdepot.com/tequipment.net, checked 2026-09-19. The two Testo 115i probes are now confirmed as separate physical units, each with its own serial number (see Model/Serial columns below) - they are not part of the Testo 558s manifold kit.

Item	Model No.	Serial No.	Qty	Unit Est.	Extended
Testo 405i Hot-Wire Anemometer Smart Probe			1	\$177.65	\$177.65
Testo 410i Vane Anemometer Smart Probe			1	\$160.65	\$160.65

Tool ID Close-Ups — Added Sept 19, 2026

These close-up tag photos were provided after the original drawer photos, to confirm exact models and serial numbers and to check whether anything in Drawer 7 had been missed. They confirm every catalog number already listed for Drawer 7 - Power Tools and the Drawer 7 - Batteries & Charger unit, and they are the source for the Model No. / Serial No. values shown in the item tables throughout this report, the seven tools added to Drawer 7 - Power Tools, the RIDGID RP 351 press tool and YAOBB LED light that resolved the two previously 'unidentified' items, and the Testo 558s manifold and two Testo 115i probes shown as separate confirmed items.

Notes on This Inventory and Valuation

This report was built from photos of tool drawers, a rolling cabinet, and loose items, without physical inspection beyond what is legible in the photos provided. Treat every estimated price as a rough retail replacement figure, not an appraisal or insurance-grade valuation.

Pricing basis: Most line items are estimated new retail replacement cost based on the brand, size, and apparent model visible in the photos, not the item's used/resale value. The Testo smart probes and manifold, CPS vacuum gauges, Toptes gas leak detector, Klein ET450 kit, RIDGID RP 351 press tool, and every Milwaukee/DeWalt tool with a visible catalog number are priced against live current listings instead of estimated - these were the items where a guess risked coming in too low for specialty or professional-grade gear.

Items noted as unidentified in the source photos carry a placeholder price and should be checked against the actual tool before relying on the total.

All items, including heat-damaged batteries and well-used/worn sockets, are priced at full new-retail replacement cost rather than resale or condition-adjusted value, per company request.

Model No. / Serial No.: Added Sept 19, 2026 from close-up tag photos of individual tools. Populated only where a tag photo (or, for a few specialty items, a verified catalog page) confirmed the number - a blank cell means no reliable number is available yet, not that the tool lacks one. A few serials are marked partially legible where the physical label was worn or photographed at an angle; re-verify those against the tool.

Changes from the Sept 19, 2026 close-up tag photos:

- Seven power tools not previously itemized were identified and added to Drawer 7 - Power Tools: a Milwaukee Compact Inflator (2475-20), a DeWalt Pipe Deburring Tool (DCE710B, marked WILL), a Milwaukee Hammer Drill/Driver (2904-20), a Milwaukee Copper Tubing Cutter (2471-20), a Milwaukee 1/4in Impact Driver (2953-20), a Milwaukee Oscillating Multi-Tool (2836-20), and a corded Milwaukee Deep Cut Band Saw (6232-20) — the drawer holds three band saws total (two cordless, one corded).
- The two previously 'unidentified' Drawer 7 tools are now identified: the red tool with hinged jaws is a RIDGID RP 351 press tool (the largest single line item in this report at roughly \$3,812 - exact jaw-set size not fully confirmed from the photo, verify against the tool), and the yellow/black tool is a generic YAOBB folding LED work light (roughly \$30).
- The Testo 558s manifold and the two Testo 115i probes are now confirmed as separate physical units with distinct serial numbers, resolving the earlier double-counting concern.

Known uncertainties that could shift the grand total meaningfully:

- The regulator/gauge lot (brand and pressure ratings not fully legible in the photos).
- Two blade cases whose contents were not individually counted.
- The RIDGID RP 351 press tool's jaw-set size (see the note on that row) - could shift that line item by well over \$1,000 in either direction.
- Several pipe wrenches and C-clamps appear in more than one drawer's photos and may be counted twice — worth a physical check.

This PDF and the companion spreadsheet use the same line items and prices, so the totals match exactly.
